

**Submit an Editorial for CSPC's Feature Editorial Series on
"Building Resilience During International Crisis"**

Write an editorial for CSPC's special editorial feature

The world has been in an unprecedented state of crises with the current war on Ukraine and longstanding pandemic, and the effects reverberate through the science and policy corridors globally.

CSPC invites you to share your opinions on the impact of the crises on Canadian and international science and innovation. The editorials may address the national or international impact on issues including but not limited to international scientific collaboration, defense, climate change, green energy, and disruption of supply chains.

Editorials will be published on the CSPC website and shared on CSPC social media channels, as well as in upcoming newsletters, ensuring wide exposure to stakeholders in science, technology, and innovation across Canada.

The publications will be posted on a rolling basis as we receive them on or before July 1.

Editorials must follow the guidelines described [here](#) and sent to editorial@sciencepolicy.ca. As our plan is to publish the editorials on a rolling basis, we encourage you to submit your piece at your earliest convenience.

To see editorials we have previously published, visit <https://sciencepolicy.ca/editorials/>.

If you have any questions about writing an editorial for CSPC, please do not hesitate to contact the Editorial Committee at editorial@sciencepolicy.ca.
